SPECIALIZED TRAINING PROGRAMS

- for AWS Training

Pertecnica Engineering stands out as a premier software training company in India, renowned for its specially curated employee training programs focused on Amazon Web Services (AWS). Our AWS training programs are meticulously designed to equip professionals with in-depth knowledge and hands-on expertise in utilizing the vast array of AWS tools and services.

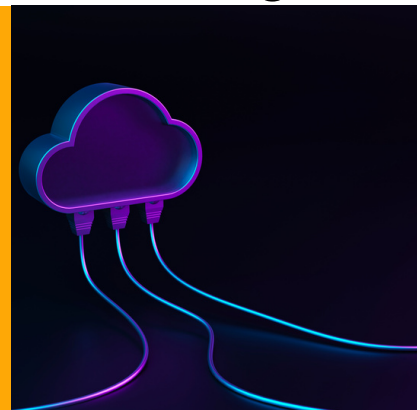

Employee Trainings on AWS Training

AWS Cloud Practitioner Essentials:

Ideal for beginners, this course provides a detailed overview of cloud concepts, AWS core services, security, architecture, pricing, and support.

Architecting on AWS:

Focused on designing scalable, elastic, secure, and highly available systems on AWS. It's suitable for solutions architects, design engineers, and others interested in understanding AWS architecture.

AWS Certified Solutions Architect – Associate/Professional:

These certification courses delve deeper into designing and deploying scalable systems on AWS. They're ideal for professionals looking to validate their AWS expertise.

Developing on AWS:

Aimed at intermediate developers, this course teaches how to develop and deploy cloud-based applications using AWS.

SysOps Administration – Associate Level:

This course covers deploying, managing, and operating scalable systems on AWS. It's suitable for system administrators and those in a DevOps role.

Advanced Networking on AWS:

Specialized training for those looking to learn about implementing and managing network architectures in AWS. This is crucial for roles focused on AWS networking.

Big Data on AWS:

Focusing on cloud solutions for big data, this course covers how to use AWS services for big data analytics purposes. It's ideal for data scientists and data analysts.

AWS Security Fundamentals:

This course teaches key concepts about AWS security and compliance, including AWS access control, data encryption methods, and securing infrastructure and applications.

AWS Machine Learning Specialization:

Courses tailored for those interested in machine learning, covering how to build, train, and deploy models using AWS services.

AWS Cloud Migration:

Focused on strategies and tools for migrating applications, data, and workloads to the AWS cloud, this course is beneficial for IT managers and technical engineers.

AWS DevOps Engineering:

This course covers the DevOps principles, including CI/CD pipelines, monitoring, logging, and automation, specifically in the AWS environment.

Serverless Computing on AWS:

Training on developing serverless applications using AWS Lambda and other AWS serverless technologies. This is key for developers interested in building microservices-based architectures.

Why Choose Pertecnica Engineering?

- **Expertise & Relevant Experience:** We have in-depth expertise in the specific subject matter and relevant industry experience. This ensures that the training is not only theoretically sound but also practically applicable to real-world scenarios in the company's specific field.
- **Customization and Relevance of Content:** Our tailored programs that align with the company's objectives, culture, and the specific skill gaps of the employees are highly valued.
- **Measurable Outcomes and ROI:** Our training will lead to tangible improvements in employee performance and productivity, thereby offering a strong return on investment (ROI).
- **Flexibility & Innovative Delivery Methods:** Flexibility in terms of scheduling, format (in-person, online, hybrid), and adaptability to different learning styles. We offer innovative and engaging training methods that keep employees motivated and facilitate effective learning.
