# SPECIALIZED TRAINING PROGRAMS

## - for Sustainability

Pertecnica Engineering leads the way in training that's all about making technology kinder to our planet. Their classes focus on using technology in a way that doesn't harm nature. It's like learning to build amazing things while taking care of our environment, just like planting trees to keep our world green and healthy.

These classes teach smart ways to use energy-saving tools, recycle old gadgets, and create software and apps that don't use too much power. With Pertecnica's training, we're learning to make technology cool and good for the Earth at the same time.

### Employee Trainings for Sustainability

Fundamentals of Sustainability	Corporate Sustainability and Responsibility	Sustainable Supply Chain Management
<p>Ideal for beginners, these courses cover basic concepts of environmental sustainability, including sustainable development goals, environmental ethics, and the principles of ecological sustainability.</p>	<p>Focused on integrating sustainability into corporate strategy, these courses cover topics like corporate social responsibility (CSR), sustainable business models, and stakeholder engagement.</p>	<p>Training in managing sustainable supply chains, including sustainable sourcing, green logistics, and lifecycle assessments of products and services.</p>
